Badminton Inter House Match - Grades 7 & 8 category Finals.

Exciting Events & Orientations on 22nd February 2025: Sports, PTM & Interactive Session

A Day to Remember at RBIA – National Science Day, Bagless Day, and Dress Down Day – 28th February 2025

February 28, 2025, was anything but an ordinary school day for the students of RBIA. It was a unique and exhilarating experience as National Science Day, Bagless Day, and Dress Down Day seamlessly blended into one memorable celebration.

The day began with an insightful presentation on '*Why February 28 is Celebrated as National Science Day*', setting the stage for an engaging series of scientific explorations. Enthusiastic young scientists took the center stage, showcasing their creativity and understanding through models, experiments, and demonstrations. The entire school gathered to witness fascinating live experiments, from thrilling rocket launches to mesmerizing dry ice displays, fostering curiosity and appreciation for scientific principles.

Following the science exhibition, each class engaged in subject-based activities where teachers employed innovative teaching methods. Students participated in musical chairs infused with social science quizzes, case studies followed by group discussions, math puzzles, and hands-on science lab experiments. Language learning was made interactive with word-building games in Kannada and Hindi, while creativity flourished through advertisement planning with catchy taglines. Additionally, students honed their listening skills with audio-based activities and had fun with tongue twisters.

No school day is complete without sports, and true to form, this one was no exception. The traditional Indian game '*Kho Kho*' resurfaced with excitement for the students of Grades 6 to 11, while cricket kept the younger ones in Grades 1 and 2 captivated. Meanwhile, students from Grades 3 to 5 enthusiastically participated in team-building games, ensuring an active and dynamic day for all.

The eventful day left the keen participants thrilled and eager for more such experiences—one that will be fondly remembered and wished for again in the days to come.
